PODCAST

Host, Casual Space

A weekly conversation with authors, illustrators, astronauts and engineers for space enthusiasts of all ages. Guests include NASA's former Deputy Administrator Lori Garver, Bill Nye the Science Guy, CEO of NanoRacks Jeffery Manber, astronauts Matthew Dominick and Leroy Chiao

BETHMUND

Professional Speaker, Writer, Space Expert

SPACE COMMUNICATIONS EVANGELIST

As a podcast host and industry influencer, I've had the privilege of showcasing the narratives of space leaders, innovators and explorers. Hosting international conferences (SpaceComExpo 2020), delivering inspirational keynote programs, and weekly podcast episodes, I'm actively and passionately communicating the benefits of space exploration and education to hundreds of thousands of people.

My work as a space advocate, NASA PAO and science communicator all stemmed from my Space Camp experience, for which I will be forever grateful. After NASA, I served as a speechwriter and advisor to several fortune 50 CEOs and senior executives. Now, I help people within the space and science communities design and deliver their own powerful and influential narratives.
